Title: General Study of Structures

Author: Chin Pao-chen (金寶楨)

Publisher: Chung-kuo K'o-hsueh T'u-shu I-ch'i Kung-ssu, Shanghai, Jul 1952

Sponsor or

Issuing Authority: Ministry of Education

No Pages: 456

Language: Chinese

Area of Coverage: China

Subjects Covered: Statically determinate structures; theory and analysis of structures; graphic statics; stress of analysis; building structures and bridges

Review: Textbook for college level engineering students covering the field of structures. Chapters 1 and 2 deal with theories and analyses of simple structures. Chapter 3 discusses statically determinate structures and the graphic static diagram. Chapters 4, 5 and 9 cover stress analysis in building structures. Chapters 6, 7, and 8 deal with the analysis of stresses in various types of bridges.

Contains reference bibliography and English-Chinese glossary.
